TCP/IP } look the meaning
OSI model }

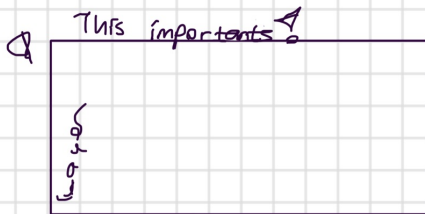

describes the functions performed in particular layers by the popular set of network protocols - TCP and IP

describes all stages of communication

Encapsulation: Packing data from a higher layer to a lower one
Decapsulation: unpacking data from lower to a higher one

Network protocols: details of communication

Physical → Ethernet and Bluetooth

they are in device
in hardware
not software

Physical layer:

responsible for the physical transportation

medium:

Copper wire

optical fiber

Morse Alphabet → example for physical communication
