```
# Loading Dataset  
--- for {  
load("irs") } chunk  
---
```

Ctrl+Alt+i

opening a chunk

for writing your code separate
them into the chunk. Because
it is easy to take errors

Output must be html format

<= assignment

sys.sleep(1000)} sistemi yutmak

1- Importing
Libraries

2- Customizing
Datasets

3- Analyzing
Dataset

4- Test your
sample

5- Apply
Methods

With each cycle,
both PSNR and
SSIM will go
down (or stay flat)
for both real
and fake images
we are looking for
a different rate
of degradation
