

Inductive logic:

Neural networks - history

Artificial Neural networks - basic definition

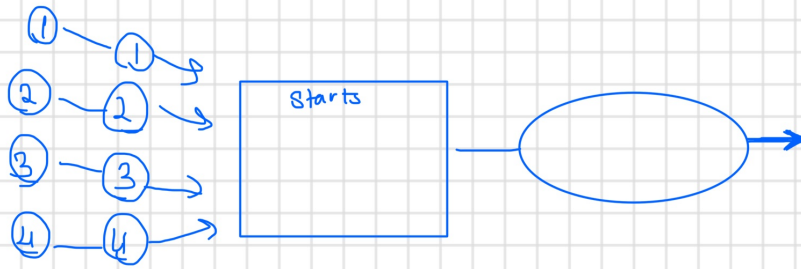

Connections, weights, and layers in a neural network

Supervised learning in Neural Networks

Learning from examples without explicit rules

Data driven learning without explicit

Artificial neuron (As easy as possible)

Notes from each of laboratory

Prepar to finish this night projects.

put teams earlier and send messages

Quiz questions will be from lecture. Not from

Questions will be 5 questions and it will be same for everyone
